

Amendments to the Specification

Please add the following new paragraph at page 10, after line 20.

Brief Description of the Drawings

Figure 1 shows the concentration of GLP-1 secreted from GLUTaq cells into the media after 2 hours incubation at 37°C with the Biozate 1.

Figure 2 shows the concentration of CCK secreted from GLUTaq cells into the media after 1 hour incubation at 37°C with Biozate 1.

On both figures 1 and 2, the x axis shows the series and the concentration of Biozate 1 used. The y axes of figures 1 and 2 show the concentration of GLP-1 or CCK secreted from GLUTaq cells into the media after incubation. For figure 1 the concentration is expressed in pico moles per litre (10^{-12} M) and for figure 2 in nanograms/ml.
